PROFESSIONAL SUMMARY

Software engineer with front-end development experience on component-based frameworks like React and NextJS, including building accessible, user-focused interfaces, alongside 2 years of professional experience in cloud technologies at Barclays. Strong foundation in AI/ML, with published research in applied machine learning. Currently pursuing a Master of Computer Science at the University of Sydney.

EXPERIENCE

• Barclays, Software Engineer

July 2024 - June 2026

Pune, India

- Utilized cloud technologies in Graduate Developer Program, enhancing infrastructure reliability and facilitating platform migrations.
- Rolled out AWS Backup service across 3 environments to strengthen data protection posture, reducing recovery time/risk exposure to critical systems.
- Led the migration of infrastructure from RHEL7 to RHEL8 across 6 Tomcat servers, resolving security vulnerabilities as a large-scale OS upgrade project requiring careful planning and stakeholder coordination.
- Migrated version control and CI/CD pipelines from Bitbucket and Jenkins to GitLab, coordinating across engineering teams to ensure smooth adoption with minimal workflow disruption.
- Identified and remediated over 100 end-of-life Lambda functions across production systems, debugging legacy code and improving long-term maintainability and security posture.

• Procura / Advance Mobility, Software Development Intern

Jan 2024 - June 2024

Mumbai, India

- Implemented real-time reporting dashboards to visualize performance metrics across 6 key operations, streamlining decision-making for internal teams and reducing time spent on manual reporting by 70%.
- Built frontend interfaces and admin portals for B2B procurement and fleet management platforms using the MERN stack (MongoDB, Express, React, NextJS, Node.js), working across frontend and backend layers to deliver end-to-end features, enhancing user engagement and operational tracking.
- Collaborated with a 4-member development team to deliver front-end features on schedule while ensuring code quality and consistency across the platform.

• Arcon Techsolutions, SDE Intern

May 2023 - July 2023

Mumbai, India

- Developed Playwright Java scripts to conduct automated testing for multiple products.
- Developed software solutions using Java and Python for various projects.
- Collaborated with team members to improve code quality and implementation processes.
- Supported test automation processes to enhance software quality during internship.
- Participated in daily stand-up meetings to discuss project progress and challenges.

PROJECTS

• Neurosafe - Advancing Mental Health using AI, ML and Blockchain

June 2023 - Nov 2023

An AI platform providing mental health support and secure record-keeping of user data.

- Tools & technologies used: Python, NextJS, Flask, Scikit-learn, TensorFlow, Keras, IPFS
- Developed a platform that analyzes user emotions using BERT (98% accuracy) and incorporates blockchain for secure record storage. Integrated a generative AI chatbot using Seq2Seq with LSTM for real-time support
- Architected frontend using React/NextJS component-based structure, integrated with a Flask backend API.
- Published a paper at IEEE 2024 3rd International Conference for Innovation in Technology (INOCON)

• Social Media Stress Detection Application

Feb 2023 - May 2023

a contextual stress-monitoring tool that interprets online user language to detect emotional distress.

- Tools & technologies used: Python, NextJS, Flask, Scikit-learn, TensorFlow, Keras
- Developed a model using various algorithms to detect stress, achieving an accuracy of 96%. Employed a questionnaire-based survey for severity prediction with a 99.5% accuracy.
- Published a paper at IEEE 2024 3rd International Conference for Innovation in Technology (INOCON)

• E-Commerce Website for the Visually Impaired

Jan 2022 - May 2022

an accessible e-commerce platform tailored for visually impaired users.

- Tools & technologies used: HTML, CSS, JS, React, NodeJS and Firebase
- Implemented user accessibility features like screen reader, voice input, user-friendly website and a high contrast mode.

TECHNICAL SKILLS AND INTERESTS

Language & Developer Tools & Frameworks: Java, Python, C++

Developer Tools & Frameworks: HTML, CSS, JavaScript, NextJS, NodeJS, ReactJS

Cloud/Databases: AWS, MongoDB, MySQL, PostgreSQL, Firebase

Core CS: Data Structures and Algorithms, Object-Oriented Design

Soft Skills: Leadership, Communication, Teamwork

EDUCATION

- **University Of Sydney** *Aug 2026 - June 2028 (expected)*
Masters in Computer Science
- **Sardar Patel Institute of Technology** *2021 - 2024*
B.Tech in Computer Engineering CGPA: 9.3/10

EXTRACURRICULAR ACTIVITIES

- **Oculus - Techno-Cultural Fest, Tech Head** *Aug 2022 - Feb 2023*
Mumbai, India
 - Led technical delivery of the fest's main website and event management platform under fixed event deadlines, coordinating with cross-functional teams to ensure zero downtime during peak traffic.
